Application

ULTRAFLOW® type 65-S/R is a static flow sensor based on the ultrasonic measuring principle. The prime area of application is as a volume flow sensor for use with thermal heat meters such as MULTICAL® and MAXICAL. ULTRAFLOW® has been designed for use in heating installations where water is used as the heat-bearing medium.

ULTRAFLOW® employs micro-processor technology and ultrasonic measuring techniques. All circuits for calculating and measuring are collected on a single board, providing compact and rational design in addition to an exceptionally high level of measuring accuracy and reliability.

The flow is measured using bidirectional ultrasonic technique based on the transit time method, with proven long-term stability and accuracy. Two ultrasonic transducers are used to send the sound signal both against and with the flow direction.

The ultrasonic signal travelling with the flow direction reaches the opposite transducer first. The time difference between the two signals can be converted to a flow velocity and thus a volume.

A multiplug, placed beneath the seal, is used during communication and calibration.

A three-wire pulse cable is used to connect ULTRAFLOW® to the calculator. This cable is used to supply the flow sensor from the calculator and also to send the signal to the calculator. The signal corresponds to the flow, or more correctly, a number of pulses proportional to the water volume flowing through the meter is transmitted.

If required a PULSE TRANSMITTER can be used to supply ULTRAFLOW®, e.g. if the distance between MULTICAL® and ULTRAFLOW® is 10 m or more.

The PULSE TRANSMITTER has a built-in supply and a galvanically separated pulse outlet.

OIML R75 DS/EN 1434

Please contact Kamstrup A/S for further information relating to type approval and verification.

CE-marking

ULTRAFLOW® Types 65-S and 65-R are marked in accordance with:

MID-directive 2004/22/EC
LV-directive 73/23/EEC (together with the PULSE TRANSMITTER)
PE-directive 97/23/EC
(DN50...DN100 category I,
DN150...DN250 category II)

MID designation (qp 0.6...400 m³/h)

Mechanical environment Class M1
Electromagnetic environment Class E1
Ambient temperature 5...55°C, non condensing closed location (indoor installation)

Technical data

Mechanical data

Metrological class 2 and 3
Environmental class Complies with DS/EN 1434 class C
Ambient temperature 0...55°C
Protection class
– flow sensor IP56
– PULSE TRANSMITTER IP54
Temperature* of medium 15...130°C
Storage temperature
– meter without battery -25...70°C
– meter with battery -25...60°C
Pressure stage PN16, PN25 flange
Time constant 6 s, fast response meter

* If the temperature of the medium exceeds 90°C a flange meter should be used. Additionally, MULTICAL® calculator or the PULSE TRANSMITTER should be wall-mounted.

Electrical data

Supply voltage 3.6 V ±10%
Battery (PULSE TRANSMITTER) 3.65 VDC, D-Cell lithium
Replacement interval 6 years @ t_{BAT} <35°C
Power supply (PULSE TRANSMITTER) 230 VAC +15/-30%, 48...52 Hz
24 VAC ±30%
Back-up supply Integral super-cap eliminates operational disturbances due to short-term power-cuts.
Cable length, flow sensor Max. 10 m
Cable length (PULSE TRANSMITTER) Depends on calculator
EMC data Complies with DS/EN 1434 class C

Pressure loss graphs

Installation

Installation angle for ULTRAFLOW® ≤DN100

ULTRAFLOW® may be installed horizontally, vertically or at an angle.

IMPORTANT!

With ULTRAFLOW® ≤DN100 (100 m³/h), the electronics/ plastic case must be placed to the side (with horizontal installation).

ULTRAFLOW® may be turned up to ±45° in relation to the pipe axis.

Straight inlet (UF 65-S)

ULTRAFLOW® requires neither straight inlet nor outlet to meet the Measuring Instruments Directive (MID) 2004/22/EC, OIML R75:2002 and EN 1434:2007. Only in case of heavy flow disturbances before the meter will a straight inlet section be necessary. We recommend to follow the guidelines in CEN CR 13582.

Installation angle for ULTRAFLOW® ≥DN150

ULTRAFLOW® may be installed horizontally, vertically or at an angle.

IMPORTANT!

With ULTRAFLOW® ≥DN150 (150 m³/h), the electronics must be placed upwards (with horizontal installation).

ULTRAFLOW® may be turned up to ±45° in relation to the pipe axis.

Working Pressure

In order to prevent cavitation the working pressure at ULTRAFLOW® must be min. 1.5 bar at q_p and min. 2.5 bar at q_s (4.5 bar for DN80). This applies to temperatures up to approx. 80°C.

ULTRAFLOW® must not be exposed to lower pressure than the ambient pressure (vacuum).

Examples of installation

Gland meter with MULTICAL®/PULSE TRANSMITTER fitted directly on ULTRAFLOW®.

Glands and short direct sensor fitted in ULTRAFLOW® (G^{3/4} (R^{1/2}) and G1 (R^{3/4}) only).

Flange meter with MULTICAL®/PULSE TRANSMITTER fitted directly on ULTRAFLOW®.

NB: For meters \geq DN100 MULTICAL® or the PULSE TRANSMITTER **cannot** be fitted directly on the flow part.

Electrical connection

Connecting MULTICAL®/MAXICAL III & ULTRAFLOW®

ULTRAFLOW®	->	MULTICAL®, MAXICAL III
Blue (GND)/11A	->	11
Red (supply)/9A	->	9
Yellow (signal)/10A	->	10

ULTRAFLOW®	->	PULSE TRANSMITTER		->	MULTICAL®
		In	Out		
Blue (GND)/11A	->	11	11A	->	11
Red (supply)/9A	->	9	9A	->	9
Yellow (signal)/10A	->	10	10A	->	10

Connecting via PULSE TRANSMITTER

3.65 VDC supply ⁵⁾	->	PULSE TRANSMITTER
Red (+)	->	60
Black (-)	->	61

ULTRAFLOW®	->	PULSE TRANSMITTER		->	MAXICAL III
		In	Out		
Blue (GND)/11A	->	11	11A	->	11
Red (supply)/9A	->	9			
Yellow (signal)/10A	->	10	10A	->	10

⁵⁾ From battery or supply module.

If long signal cables are used, please consider the installation carefully. There must be **at least 25 cm** between the signal cable and all other cables due to EMC.

Example of connecting ULTRAFLOW® and MULTICAL®

ULTRAFLOW® type 65-S/65-R, $q_p \leq 100 \text{ m}^3/\text{h}$

ULTRAFLOW® type 65-S with terminal, $q_p \geq 150 \text{ m}^3/\text{h}$

⁶⁾ XXX-code pertaining to final assembly, approvals etc. is determined by Kamstrup A/S. Some variants may not be included in national approvals.

⁷⁾ New pulse figures compared with ULTRAFLOW® II.

⁸⁾ MID marking: q_i:q_p = 1:25

ULTRAFLOW® type 65-S ≤DN100 are as standard supplied with 2.5 m cable, but can also be supplied with 5 or 10 m cable.

When ordering ULTRAFLOW® with 5 and 10 m cable, please state type No. 65-R-????-XXX ⁶⁾ and the required cable length.

ULTRAFLOW® ≥DN150 is supplied without cable. A 5 m or 10 m cable can be ordered and delivered, separately.

PULSE TRANSMITTER – type No. 66-99-603

The PULSE TRANSMITTER is supplied with built-in supply for ULTRAFLOW®. Battery, 24 VAC and 230 VAC supply are available. Please state the required supply type when ordering.
