- NESA...08 (S) series
- NENUTEC spring return damper actuators are especially designed and produced for applications in the HVAC systems.
- Our wide range of NENUTEC spring return damper actuators has been developed to operate and position air dampers of different sizes that perform safety functions.

Product Features

- Torque 8 Nm
- Damper size 1.5 m²
- Power Supply AC/DC 24 V and AC 230 V
- Control 2 Point
- 2 auxiliary switches (SPDT)
- Shaft dimensions
Ø 8 to 22 mm round / □ 6 to 15 mm square
- Minimum shaft length 80 mm
- Selectable direction of rotation
- Adjustable angle of rotation
- Actuator with 1000 mm cable connection
- Customer version on request

Changing Direction of Rotation NESA24/230...(S)

Factory-set CW!

The direction of rotation can be defined dependently on the assembly of the shaft adapter inclusive adapter ring. Important remark:

OEM Customised Version on Request

NENUTEC offers you actuators in customised versions, e.g. with your own brand name, with colour-coordinated applications and with your particular demand. Please contact us for further information.

Important Remark

Consult NENUTEC representatives for specific requirements and material selections for your intended application.

This actuator includes electrical and electronic components and may not be disposed as household garbage. Please consider the local valid legislation.

AC / DC 24 V: Connect via safety isolating transformer.
 AC 230 V: To isolate from the main power supply, the system must incorporate a device which disconnects the phase conductor (with at least a 3 mm contact gap).
