

Q 606M-KOMBI -THERMOMETER WITH LOCAL READING AND ANALOGUE SIGNAL

APPLICATION

An instrument with the capability of providing both a visual reading and analogue signal. To reduce welding of sockets.

DESIGN

Standard Q606M (straight) or Q 606MV (angle) with measure 36x150 mm.

Connection plug after DIN 43650 at the top.

With DIN-contact type PG9, DIN 43729.

Q 606M-Kombi has sensor Pt-100 or sensor Pt 1000 after DIN IEC 751, class B and with 3-wires for distance reading.

RANGE AND DIVE TUBE LENGTHS

As standard between -30° up to 160° C and with max L = 200 mm in brass, steel, special brass and stainless steel. Longer dive tubes and other ranges available in specially customised orders.

ARTICLE NUMBERS

Use our standard numbers on page B1 and put a K on the end. For example: Q 606M134-K or Q 606MV221-K.

A digital electrical instrument for connection to Q 606M-Kombi can be provided according to wishes.
