## FL SWITCH SFNB 5(8)TX

Five and Eight Port Standard Function Ethernet Switch with Narrow Housing

## AUTOMATION

Data Sheet
2642_en_C © PHOENIX CONTACT - 01/2009

## 1 Description

The FL SWITCH SFNB 5TX and FL SWITCH SFNB 8TX Factory Line switches can be used for quick and costeffective Ethernet network expansion to the field level. Due to the narrow housing design, the switches are suitable for use in control cabinets and junction boxes. The switch supports the auto negotiation function and offers transmission speeds of $10 / 100 \mathrm{Mbps}$. Mixed operation for the connection of segments with different data transmission speeds is also supported.
The RJ45 ports offer an auto crossing function, which means it is not necessary to make a distinction between 1:1 and crossover cables.

## 2 Features and Benefits

- Increased network performance
- Switched Ethernet networks reduce traffic and nonpredictable timing
- Easy network expansion
- No configuration of the switch
- Auto-negotiation and autocross simplify cabling
- Couple copper network segments with different bit rates with automatic detection of the data transmission speed of 10 or 100 Mbps .
- Easy maintenance
- Individual LEDs at each port indicate communication activity and data rate
- Removable power connector
- Internal, resettable fuse
- Rail mountable (EN 50022)
- Industrial rated
- Rugged metal housing for industrial applications
- -10 to $60^{\circ} \mathrm{C}$ operating range
- Meets IEC 61000-6-2 electrical noise immunity
- Meets IEC 60068-2-6 vibration test standards
- Meets IEC 60068-2-27 shock test standards

## 4 Technical Data

## General Data

| Function | Switch/repeater; conforms to standard IEEE 802.3 |
| :---: | :---: |
| Latency of the communication processor |  |
| FL SWITCH SFNB 5TX FL SWITCH SFNB 8TX | $8 \mu$ s plus frame time $9 \mu$ s plus frame time |
| Housing dimensions (width x height x depth) |  |
| FL SWITCH SFNB 5TX FL SWITCH SFNB 8TX | $\begin{aligned} & 28 \times 110 \times 70 \mathrm{~mm} \\ & 50 \times 110 \times 70 \mathrm{~mm} \end{aligned}$ |
| Weight |  |
| FL SWITCH SFNB 5TX FL SWITCH SFNB 8TX | $\begin{aligned} & 205 \mathrm{~g} \\ & 291 \mathrm{~g} \end{aligned}$ |
| Operating temperature | $-10^{\circ} \mathrm{C} \ldots 60^{\circ} \mathrm{C}$ |
| Storage temperature | $-20^{\circ} \mathrm{C} \ldots 85^{\circ} \mathrm{C}$ |
| Degree of protection | IP20, DIN 40050, IEC 60529 |
| Protection class | Class 3 VDE 0106; IEC 60536 |
| Humidity (operation and storage) | 10\% to 95\%, no condensation |
| Air pressure (operation) | 86 kPa to $108 \mathrm{kPa}, 1500 \mathrm{~m}$ above sea level |
| Air pressure (storage) | 66 kPa to $108 \mathrm{kPa}, 3500 \mathrm{~m}$ above sea level |
| Mounting rail | EN 50022 |
| Preferred mounting position | Perpendicular to a standard mounting rail |
| Connection to protective earth ground | Snapped onto a grounded mounting rail |
|  |  |
| Supply Voltage (US) |  |
| Connection type | Removable, spring-cage connector |
| Wire size | 0.2 to $2.5 \mathrm{~mm}^{2}$ solid/stranded |
| Recommended PE wire size | 2.5 mm ${ }^{2}$ |
| Nominal power supply | 24 V DC |
| Permissible ripple | $3.6 \mathrm{~V}_{\mathrm{pp}}$ within the permissible voltage range |
| Permissible voltage range |  |
| FL SWITCH SFNB 5TX <br> FL SWITCH SFNB 8TX | $\begin{aligned} & 12 \mathrm{~V} \text { DC ... } 48 \text { V DC } \\ & 9 \vee \mathrm{DC} \ldots . .32 \mathrm{~V} C \end{aligned}$ |
| Current consumption, nominal |  |
| FL SWITCH SFNB 5TX | 180 mA @ 24 V DC $340 \mathrm{~mA} @ 12 \mathrm{~V}$ DC |
| FL SWITCH SFNB 8TX | $138 \mathrm{~mA} @ 24 \mathrm{~V}$ DC 272 mA@12 V DC |
| Inrush current maximum |  |
| FL SWITCH SFNB 5TX FL SWITCH SFNB 8TX | 15 A for $35 \mu \mathrm{~s}$ <br> 9.1 A for $40 \mu \mathrm{~s}$ |
| Test voltage | 500 V DC for one minute |
| Protection against polarity reversal | Present |
| Interfaces |  |
| Total number of Ethernet interfaces (RJ45) |  |
| FL SWITCH SFNB 5TX FL SWITCH SFNB 8TX | $\begin{aligned} & 5 \\ & 8 \end{aligned}$ |
| MAC Address Table Size (Entries) | 2 K |
| Properties of RJ45 Ports |  |
| Connection format | 8-pos. RJ45 female connector on the switch |
| Connection medium | Twisted-pair cable with a conductor cross section of $0.14 \mathrm{~mm}^{2}$ to $0.22 \mathrm{~mm}^{2}$ |
| Cable impedance | $100 \Omega$ |
| Transmission speed | 10/100 Mbps |
| Maximum network segment length | 100 m |

| Mechanical Tests |  |
| :---: | :---: |
| Shock test according to IEC 60068-2-27 | Operation: $25 \mathrm{~g}, 11 \mathrm{~ms}$ period, half-sine shock pulse Storage/transport: $50 \mathrm{~g}, 11 \mathrm{~ms}$ period, half-sine shock pulse |
| Vibration resistance according to IEC 60068-2-6 | Operation/storage/transport: $5 \mathrm{~g}, 150 \mathrm{~Hz}$, Criterion 3 |
| Free fall according to IEC 60068-2-32 | 1 m |
| Conformance With EMC Directives |  |
| Developed according to IEC 61000-6-2 |  |
| IEC 61000-4-2 (ESD) | Contact: $\pm 4 \mathrm{kV}$, Criterion B Air: $\pm 8 \mathrm{kV}$, Criterion B |
| IEC 61000-4-3 (radiated-noise immunity) | $10 \mathrm{~V} / \mathrm{m}$, Criterion A |
| IEC 61000-4-4 (burst) | Ports: $\pm 1 \mathrm{kV}$, Criterion B DC power: $\pm 2 \mathrm{kV}$, Criterion B |
| IEC 61000-4-5 (surge) | Ports: $\pm 1 \mathrm{kV}$, Criterion B DC power: $\pm 500$ V, Criterion B |
| IEC 61000-4-6 (conducted noise immunity) | $10 \mathrm{~V} / \mathrm{m}$, Criterion A |
| IEC 61000-4-8 (noise immunity against magnetic fields) | $30 \mathrm{~A} / \mathrm{m}$, Criterion A |

### 5.1 Diagnostic and Status Indicators

| Des. | Color | Status | Meaning |
| :---: | :---: | :---: | :--- |
| US | Green | ON | Supply voltage US in the <br> tolerance range |
|  |  | OFF | Supply voltage US too <br> low |

### 5.2 Data Transmission Speed LEDs (2 LEDs/Port)

|  | 10 Mbps | 100 Mbps |
| :---: | :---: | :---: |
| LNK/ACT | ON/blinking | ON/blinking |
| $\mathbf{1 0 0}$ | OFF | ON |

LNK/ACT LED:
ON: indicates an electrical link
Flashing: indicates network traffic (at high data rates the blinking is in a constant rate)

## 6 Installation

## CAUTION:

Only qualified personnel may start up and operate this device. Qualified personnel are persons authorized to start up, ground and mark devices, systems, and equipment according to the standards of safety technology.

## NOTE:

The FL SWITCH SFNB 5(8)TX module is designed for SELV and PELV operation according to IEC 61140/EN 61140.

Install the FL SWITCH SFNB 5(8)TX on a clean mounting rail. To avoid contact resistance only use clean, corrosionfree mounting rails that meet the EN 50022 standard. End clamps can be mounted on both sides of the module to stop the modules from slipping on the rail.

## NOTE:

Connect the mounting rail to protective earth ground using a grounding terminal block. The modules are grounded when they are snapped onto the rail. Connect protective earth ground with low impedance.

### 6.1 Assembly

1. Place the module onto the rail from above. The upper holding keyway must be hooked onto the top edge of the rail.
2. Push the module from the front towards the mounting surface.
3. Once the module has been snapped on properly, check that it is fixed securely on the rail.

### 6.2 Removal

1. Insert a suitable tool (e.g., needle-nose pliers) into the arresting latch and pull it down.
2. Pull the module slightly away from the mounting surface.
3. Lift the module from the rail.

### 6.3 Power Connection

The switch is designed for SELV and PELV operation at +24 V DC according to IEC 61140/EN 61140. Only SELV and PELV according to the defined standards may be used for supply purposes.
Snapping the switch onto a grounded mounting rail connects it to the ground potential. In an environment particularly prone to EMI, noise immunity can be increased by an additional low-impedance connection to functional earth ground (see Figure 2).

Figure 2 Power connections

### 6.4 Ethernet Interface

The FL SWITCH SFNB 5(8)TX has either five or eight Ethernet ports on the front in RJ45 format to which only twisted-pair cables with an impedance of $100 \Omega$ can be connected. The data transmission speed is $10 / 100 \mathrm{Mbps}$. In addition, every port has an auto crossing function: it is not necessary to make a distinction between 1:1 or crossover Ethernet cables.

Figure $3 \quad$ RJ45 pin assignment

## 7 Switching Characteristics

## - Store and Forward

All data telegrams received by the switch are saved and their validity checked. Invalid or faulty data packets ( $>1522$ bytes or CRC errors) and fragments (< 64 bytes) are rejected. Valid data telegrams are forwarded by the switch. The switch always forwards the data using the data transmission speed that is used in the destination network segment.

- Multi-Address Function

The switch independently learns the addresses for termination devices, which are connected via a port, by evaluating the source addresses in the data telegrams. Only packets with unknown addresses, with a source address of this port or with a multicast/broadcast address in the destination address field are forwarded via the corresponding port. The switch can store addresses in its address table with an aging time of 5 minutes. This is important when more than one termination device is connected to one or more ports. In this way, several independent subnetworks can be connected to one switch.
